

# STEAM Questions

---

1. Van Gogh described the brightest object in the sky at dawn during the spring of 1889 as the morning star. What is the morning star? Is it really a star?
2. Earth's moon is clearly depicted in this painting. How far is the moon from the earth in miles?
3. Are the other bright objects in the sky stars or galaxies? What is the difference between galaxies and stars? What do we call our star?
4. Earth is located in a galaxy. Name it. How many stars are in our galaxy?
5. In this painting our star is out of sight. When we experience daylight is it because our star rose or the earth rotated? Share how this works.
